

SAR Consultancy & Centurion Risk Assessment LTD
4 day Hostile Environment & Emergency First Aid
Training

SAR Consultancy, in partnership with Centurion Risk Assessment Services, is running a four day intensive HIGH RISK HEFAT® Course in Abuja, Nigeria. This four day course is an intensive course that covers many of the threats faced by those living and working in hostile environments. This course will be tailored to the Nigeria environment.

Hostile Environments and Emergency First Aid Training

This course will equip candidates with the necessary tools, both practically and emotionally, to be able to continually risk assess their safety by developing an understanding of known and developing risk factors. This course is a practical, hands-on training course which has proved effective in helping participants to confidently manage risks to the lowest possible level, and work in dangerous places more safely.

The course is aimed at aid agencies, NGOs, international media, oil workers, defence contractors, diplomatic staff and other professional organisations, who operate in challenging security environments.

This course ensures companies and organisations fulfil their Duty of Care obligations for staff deployed to Nigeria, but the skills learned are transferable to areas such as Syria, Egypt, Libya, Iraq, Afghanistan and other High Risk areas.

On successful completion of the course, candidates receive a Centurion Certificate of Training valid for 3 years. Before expiry of your HEFAT® certificate, you can attend the 2-day Refresher course to renew your certificate for a further 3 years.

Provisional Dates: 26-29 October 2015

Venue: To be confirmed, Abuja

Booking: To reserve a place on the course or for further information, please email:
info@sarconint.com
